

Your normal · 7 days

Don't start **anything** new yet. One minute every evening: tick one number per area – go with your gut, don't overthink it.

Start (date)

What do you already take? (stays the same)

1 awful 2 meh 3 okay 4 good 5 great

Day Date	Sleep	Energy	Focus	Mood	Calm	Your own area	Disruptors
Example Oct 12	1 ☒ 3 4 5	1 ☒ 3 4 5	1 2 ☒ 4 5	1 2 3 ☒ 5	1 2 ☒ 4 5		short on sleep
Day 1 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Day 2 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Day 3 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Day 4 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Day 5 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Day 6 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Day 7 __/__/	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
Ø sum ÷ days							

Disruptors – jot them down, e.g.: short on sleep · lots of stress · alcohol · sick · travel · workout · late meal

How it works – 4 steps

1 Track your normal

This page: 5–7 evenings with nothing new. That's what you compare against.

2 One at a time

Page 2: only ever test one supplement. Otherwise you won't know which one it was.

3 Rate every evening

Same areas every evening + disruptors. One minute is enough.

4 Compare

Test average minus normal average – bottom of page 2. Then: keep, maybe or drop.

Kolbi does this automatically in the app

Reminds you every evening, works out the averages and compares with your normal. Start free, no account.

**Test:**• days

Only this one supplement is new – everything else as in your normal. Same time, same amount (as on the label).

∅ sum ÷ days							

Disruptors – jot them down, e.g.: short on sleep · lots of stress · alcohol · sick · travel · workout · late meal · **Longer? Print this page again.**

How to compare

	Sleep	Energy	Focus	Mood	Calm	<u> </u>
∅ Normal (page 1)						
∅ Test (this page)						
Difference (test – normal)						

- **Average:** add up all numbers in a column and divide by the number of days. Treat days with a big disruptor (sick, hardly slept, alcohol) the same way in both phases – easiest: leave them out.
- **Below about 0.5:** probably no noticeable difference for you right now. **From about 0.5** (with similar disruptors): a hint – nothing more.
- **Double-check:** stop it for a few days afterwards. If your rating drops back to your normal, that points more towards a real difference for you.

My decision: ☐ Keep ☐ Maybe ☐ Drop
